

Cleaning Chemical Safety Checklist

- Read all labels before using a chemical product. - Never mix bleach with ammonia, vinegar, or other cleaners.
- Always wear appropriate PPE (gloves, goggles, mask).
- Keep cleaning chemicals in their original labeled containers.
- Store products in a locked cabinet, out of reach of children and pets.
- Ventilate the area by opening windows or turning on fans.
- Know where the Safety Data Sheet (SDS) is for each chemical.
- Wash hands after using any cleaning product.
- Do not eat, drink, or touch your face while cleaning.
- Use only the recommended amount, never double up.
- Immediately clean up any chemical spills with gloves and absorbents.
- Dispose of unused chemicals according to local regulations.
- Keep emergency contacts (e.g., Poison Control) easily accessible.
- Download or print this checklist and post it near your supplies area.
